PERSONAL PROJECTS

Virtual Desktop Assistant (03/2022 - 07/2022)

- This project is based on Artificial intelligence. In this project, I have tried overcoming Microsoft Cortana's drawbacks. Like we can't open an app directly by voice commands in windows os.
- In this project I added various features like weather, chatbot, voice commands, advance search, and OS commands. In future, I will Add Some IoT Features.
- Project Link: [disha-voice-assistant.](#)

Net Banking System In PHP (12/2020 - 03/2021)

- In this project, I have developed various Net Banking Features like money transfer, admin panel, user dashboard, two-step authentication, etc.
- In this project I have used google authenticator for two-step verification also I have added SMS integration for international transfer.
- Live Project Link: [net-banking-system.](#)
